

EtherNet/IP Activation Process for the ioLogik E1200 Series

The ioLogik E1200 series supports the EtherNet/IP protocol once the device has been registered and activated. In this note, we will explain how to activate the EtherNet/IP function in the ioLogik E1200 series. Please remember that the EtherNet/IP function can only be activated after the following firmware and utility versions are up-to-date.

- ioLogik E1210 V2.5 (std. version)
- ioLogik E1211 V2.4 (std. version)
- ioLogik E1212 V2.5 (std. version)
- ioLogik E1213 V2.6 (std. version)
- ioLogik E1214 V2.5 (std. version)
- ioLogik E1240 V2.4 (std. version)
- ioLogik E1241 V2.5 (std. version)
- ioLogik E1242 V2.5 (std. version)
- ioLogik E1260 V2.5 (std. version)
- ioLogik E1262 V2.5 (std. version)
- ioSearch V1.15 (std. version)

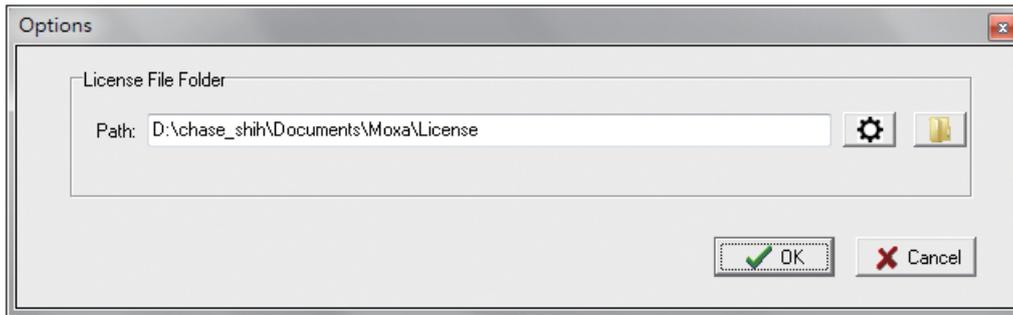

Technical Note

Take the following steps to activate the EtherNet/IP function:

Step 1: Assign the license file folder

After installing ioSearch V1.15, the user should assign a folder to place the license file in. Click **System** → **Options** to find the window displayed below. Next, click the settings icon (shown at the right) to assign the license folder. Click **OK** to complete the settings.

Settings Icon

Step 2: Get the device's serial number

Before you start the registration process, locate the serial number on the ioLogik E1200 device. The device's serial number can be found on the device label, as shown in the picture below.

▲ Technical Note

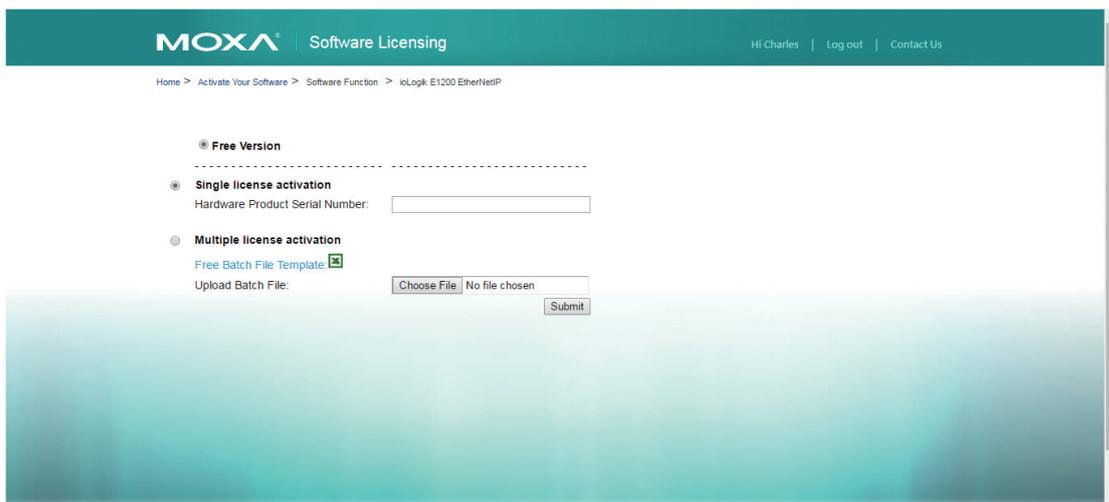

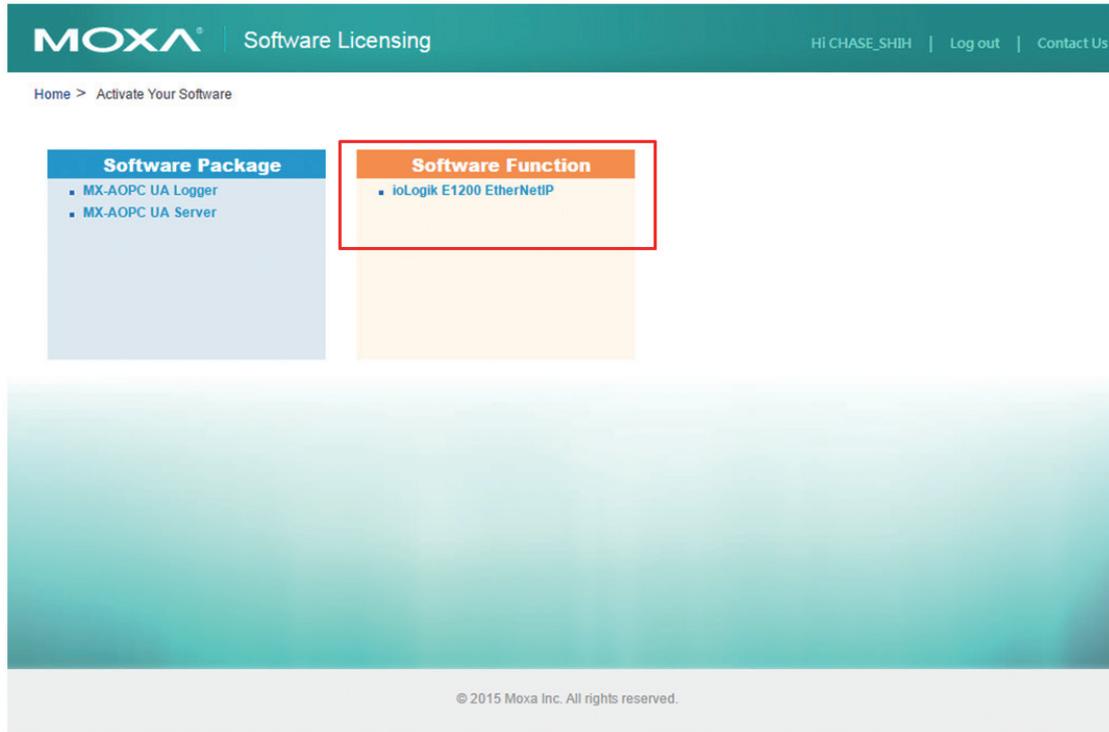

Step 3: Log in to Moxa's license server

Moxa's licensing server can be accessed at the following link: <http://license.moxa.com>. Input the ID and Password to log in to the system. Click the **Apply for an account** button to register an account before you login for the first time.

The screenshot shows the Moxa Software Licensing System interface. At the top, there is a teal header with the Moxa logo and the text "Software Licensing". Below the header, the main content area has a teal background. On the left, there is a section titled "Manage Your Software License" with the text "Login Moxa Software Licensing System to activate or query your Moxa software license." Below this text is a graphic of a world map with a rolled-up certificate and a magnifying glass over it. The certificate has the word "CERTIFICATE" and some illegible text. On the right, there is a login form with fields for "User ID" and "Password", a "Forgot your password?" link, and two buttons: "Login" and "Apply for an account". At the bottom of the page, there is a copyright notice: "© 2015 Moxa Inc. All rights reserved."

Step 4: Register the device on the Moxa Licensing Server

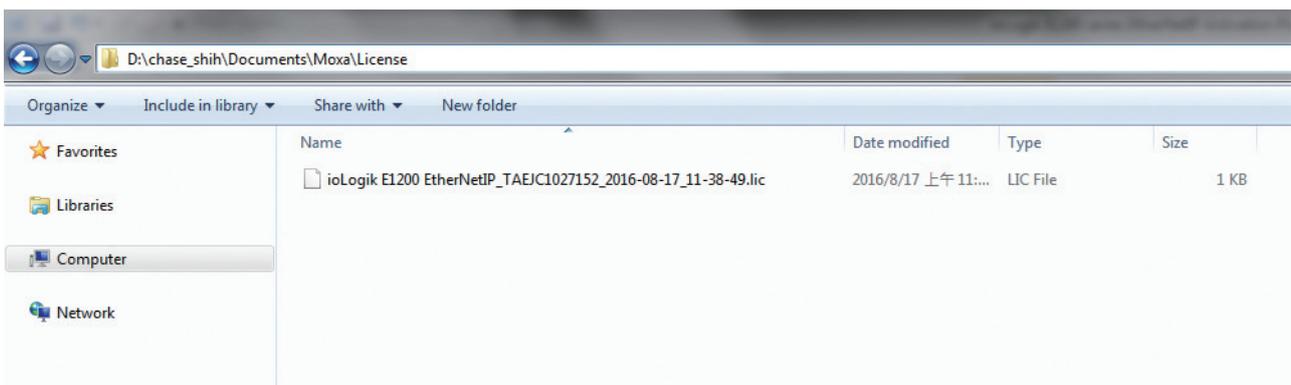

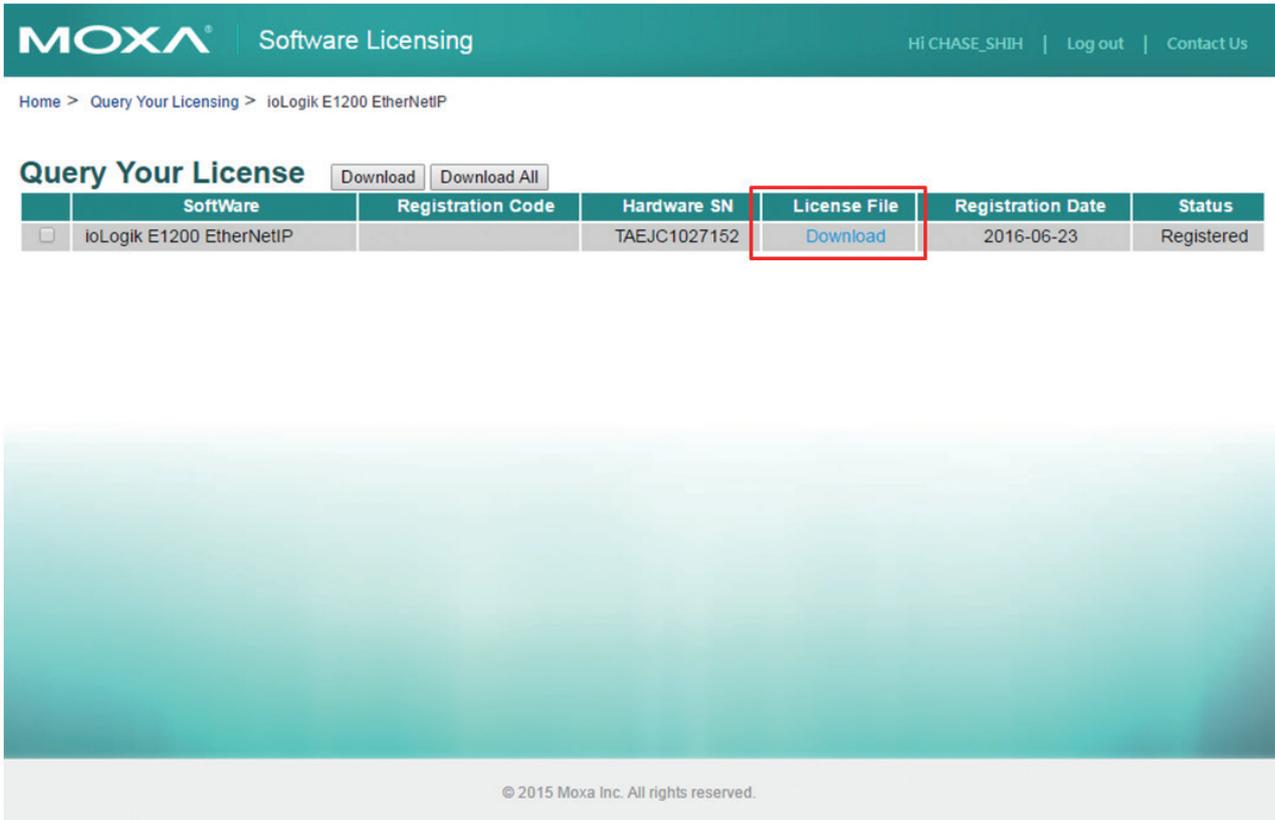

Click the **ioLogik E1200 EtherNet/IP** link to go to the registration page. The Moxa Licensing Server provides two ways to complete the registration process. To register a single product, simply input the serial number. To register multiple products, you will need to input serial numbers in a special format. The template for multiple device activation can be downloaded below.

Technical Note

Step 5: Download the license file and put it in the designated folder

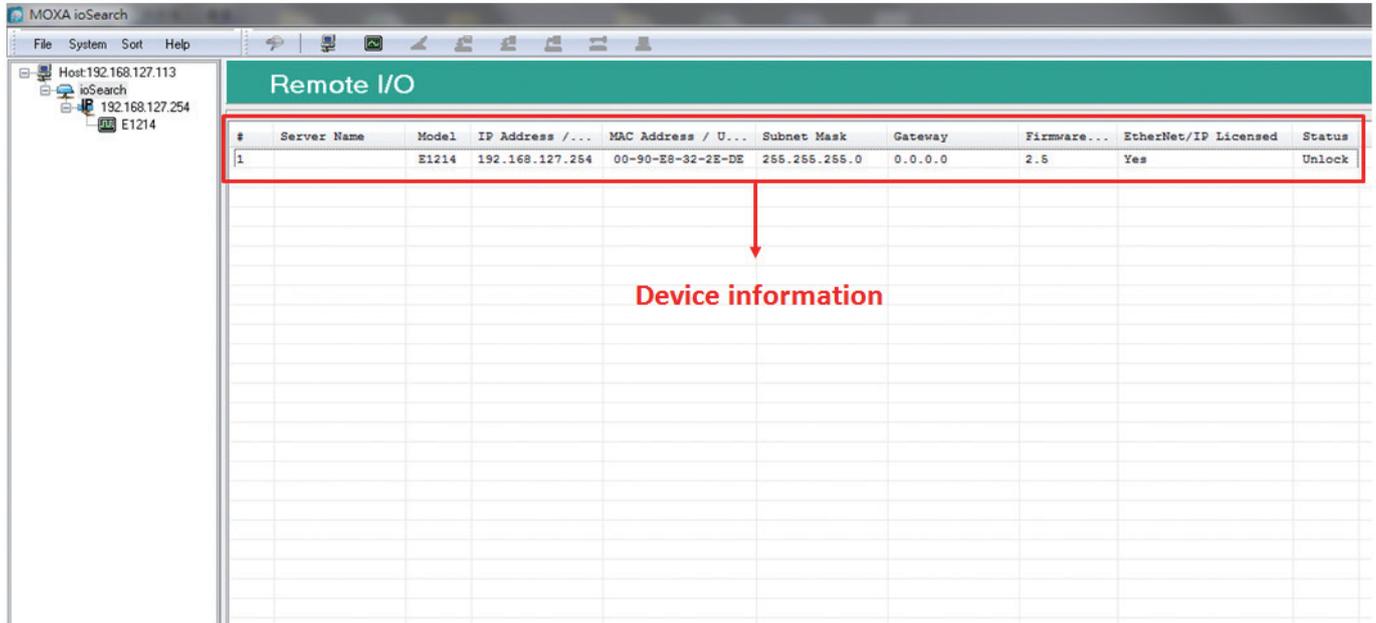

After inputting the serial number, click the **Submit** button. The system will provide a link that you can click to download the license file. Save the downloaded file in the folder that was assigned in step 1, and unzip the file.

Technical Note

Step 6: Use ioSearch to scan the devices on the network

Connect the ioLogik E1200 devices to the computer and use ioSearch to search for the correct device. Device information will be displayed in the window.

Technical Note

Step 7: Activate the EtherNet/IP function in the ioLogik E1200 series

Right click on the device and select Activate EtherNet/IP. The progress of the activation process can be viewed and ioSearch will inform you when the activation has finished.
